Powdertech Wood Finish

A WIDE RANGE OF UNIQUE FINISHES
OFFERING THE WARMTH AND
TEXTURE OF WOOD FOR ALL
METALLIC SURFACES.

■ CREATIVE FINISHING

Powdertech is one of the UK's most distinctive metal finishing companies, creating finishes that portray excellence and individuality.

The PWF collection is a timeless range of finishes, which are being used in a variety of situations including interior design, architectural exteriors, retail display, sign systems and office furniture.

■ A PALETTE FOR ALL SEASONS

The PWF collection has expanded rapidly to client requests and we now have over seventy different ‘woods’ available for clients to match and blend into any environment.

The innovative finishing system replicates wood finishes on metal substrates whilst retaining their natural warmth and texture.

■ LEADING THE WAY

This innovative system can be applied to a range of substrates including extruded aluminium, fabricated components in steel or aluminium and materials requiring cutting, bending or drilling.

The flexibility of process allows difficult or complex shapes to be coated, which would be considered too expensive to achieve in wood.

Extensive independent testing has shown the PWF system to meet the external performance requirements of BS6496, powder coatings on aluminium.
